

Name: **Rameshbhai Patoliya**
Age/Sex: 56 Years/Male
Ref. by: Dr. RAVI PATOLIYA

Registration Date: 10/03/2026 18:40
Lab. Ref. No.: **22403-R**
Sample no. 7273

TEST

RESULT

REFERENCE RANGE

HBA1C -test by HPLC

HbA1c:

5.5 %

Biological Reference Interval:

Non diabetics : < 5.7 %
Prediabetic : 5.7 - 6.4 %
Excellent Control : 6.4 - 7.0 %
Good Control : 7.0 - 8.0 %
Action Suggested : > 8.0 %

Method: Glycosylated Hemoglobin Test (HbA1c) is performed by the Gold Standard Reference, High Performance Liquid Chromatography (HPLC) from Bio-Rad, USA.

Instrument: D-10, Bio-Rad from France

Average Blood Sugar Level: 111.15 mg/dl

Comment:

Glycosylated Hb [Hb A1c] is used to assess long term Blood glucose control in diabetics.
- Hb A1c values reflect the average Blood glucose level present over the previous 2 - 3 months.
Hb A1c is free of day fluctuations, & is unaffected by recent food intake.
- The risk of microalbuminuria & microangiopathic lesions of diabetes mellitus including retinopathy & glomerulopathy increases with Hb A1c levels over 8% [corresponds roughly to average Plasma glucose values of over 207 mg/dl]. Hemolytic anaemia may result in a decrease in the HbA1c level, whereas an increased level of Hb-F in a falsely elevated Hb A1c level.

URINE EXAMINATION

PHYSICAL:

Quantity: **30**
Colour: Pale yellow
Odour: Normal
Deposit: Absent
Reaction: Acidic
Specific Gravity: 1.015

CHEMICAL:

Albumin: Absent
Sugar: **Present (+)**
Acetone: Absent
Bile Salts: Absent
Bile Pigments: Absent

MICROSCOPIC: (After centrifugation at 2000 r.p.m. for 5 minutes)

Red blood Cells: Absent
Epithelial Cells: 2 - 3 / HPF
Pus Cells: 2 - 3 / HPF
Bacteria: Absent
Crystals: Absent
Amorphous: Absent
Casts: Absent
